

Thank you for being a part of the Spicy Pumpkin family!

Before using your Spicy Pumpkin Animated Crystal Ball kit, please read these instructions.

1. Cables & Connectors:

There are several cables and connectors you need to be aware of:

- USB Data Cable - this allows you to upload and download projections to your Hauntley Head. This cable is not used during the operation of your head.

- USB Power Cable - This plugs into one of the female connectors on the “Y” splitter coming out of the battery pack.
- USB Splitter Cable - Splits the power from the battery pack to two USB female connectors -

- Volume and Toggle Board - The left and right buttons allow you to change the volume up and down. The center button allows you to toggle between multiple video projects if you have them loaded in your head. Your head only came with the preloaded Madame Leota projection.
- Red and Black Wire Speaker Connectors - These are used to connect the head to the speaker
- Fairy Lights USB - This connector should connect to the other USB female connection on the “Y” splitter cable.

2. The head is preloaded with the Madame Leota Projection file and will run automatically once you power-on the head from the battery pack. Turn the battery pack to “On” and the fairy lights and head should turn on automatically and play.

3. Battery pack recharging - Use the included adapter that came with your battery pack to recharge. Please note that the battery pack has to be switched on in order to charge. You can disconnect the Hauntley head power cable and fairy lights to do this so they are not running when you are recharging the battery.

4. Storage - Store the prop in a cool dry place. Direct sunlight and/or excessive heat (100 F degrees or higher) can cause the clone or other plastic parts to warp. Moisture can cause the projector and circuits to malfunction or cause damage. When using the prop outside, it is recommended that you bring it indoors when not in use or during bad weather events.

5. For styling the hair please reference this video for instruction -

<https://youtu.be/8MO6pc195Bo?si=3oFsLwu3MFi1BKOq>

6. If you would like to direct the sound to an external powered speaker, You can purchase this cable to do this -

<https://spicypumpkinhauntshop.com/products/amplifier-powered-speaker-cable-adapter>

Now that your head is ready to use. You can upload other projections that can also be used on the head. These and other upgrades for your prop can be found at - spicypumpkinhauntshop.com

If you are interested in doing a personalized version where we put your face and voice on a projection that can be used inside the head, please reach out to us at spicypumpkinproductions@gmail.com for pricing and more information.
